Go from Dingy and Dented to Clean and Bright with Fit Perfect™

OPERATOR TESTED & APPROVED

"I watched my employees struggle with cold bar setups for years when I oversaw 250 stores at a major chain restaurant.

I had seen enough, so I created the easy setup cold bar solution myself."

CREATOR OF FIT PERFECT™

Bugambilia®
RESIN-COATED ALUMINUM

Why Fit Perfect™?

It's the fastest, easiest way to replace your existing stainless steel setup for a more refined presentation and overall improved operations.

1 Easily Set Up

Fit Perfect™ switches 1-for-1 with standard stainless steel pans!

Proprietary, patent-pending spacer (aka adapter) bar design locks pans in place to prevent falling and shifting.

2 Easily Reconfigure

Effortlessly create layouts for different dayparts and applications with easy-lift corners.

3 Easily Separate

No more banging on counters to separate pans, just stack and store.

"When I started my career, stainless steel pans were the only option. But now I love my Bugambilia® Fit Perfect™ because of the modern presentation!

Switching was easy because the pans come in standard sizes. Fit Perfect™ pans stack, don't stick together, and hold temperature better than stainless steel or plastic inserts."

EXECUTIVE CHEF DAN THOMAS | SAINT LOUIS, MO

4 Easily Outperforms Stainless Steel

Made from Bugambilia® resin-coated aluminum, Fit Perfect™ maintains food-safe temperatures longer than stainless steel, giving you a fresher, longer-lasting product.

5 Easily Adapts to Your Needs

Fit Perfect™ isn't just for salad bars. It's also perfect for breakfast bars, yogurt bars, snack stations, and dessert toppings.
